

# Chinese lizard tail

*Houttuynia cordata*

LIFE RIPARIAS alert list species

©Dinkum (1)

Invasive species native to Asia.

**Rare** in the wild in Belgium

Found in **wetlands** and **cool forest environments**, in partially shaded sites

**Terrestrial or submerged semi-aquatic perennial plant.**

Grows to heights of 30 to 40 cm

There is a cultivar with tricolour leaves which has, however, not been observed in the wild yet

©Deb Nystrom (2)

Fast growing rhizomatous species forming **dense stands**

©zmp (3)

If you spot that species, record your observation on

Observations.be

iNaturalist

You will contribute to the protection of our ecosystems against invasive alien species

Heart-shaped leaves arranged alternately (length < 1.5 width) along the stem

Small yellow flowers crowded into a short spike

©Σ64 (4)

Leaves : 4 to 10 cm

Strong, peppery, lemon-like scent

4 white, petal-like bracts at the base. Can have double flowers

## Not to be confused with

### *Saururus cernuus* - Exotic

©Eric Hunt (5)

- Flowers aggregated in long spikes curved downwards
- Light green lower leaf surface
- Larger plant size

### Seedlings of *Fallopia* spp. - Exotic

- Alternate leaf arrangement with leaves not or slightly cordate at the base and straight edges
- Reddish stems with marked nodes
